

H.M. HOPPER · SAINT JOHN, N.B.

FROM DUSK TILL DAWN

THIS CATALOGUE and all
fixtures shown herein are made
in Canada by Canadian Workmen.

BUY MADE-IN-CANADA GOODS

Catalogue No. 9

 It is with much gratification and pleasure that we now present you with our latest Catalogue Number 9, upon which, great care and patience has been exercised to illustrate forcibly and without misrepresentation the high quality of Electroliers designed for apartment, residential and commercial lighting.

The Electrolier today stands foremost as being leaders in Lighting Equipment in Canada, and it is through the confidence and co-operation cordially given by our clients, that we have been inspired to produce Electroliers in keeping with the times.

We also take pleasurable pride in announcing, that since the issuance of our last catalogue, necessary steps have been instituted to increase our plant in order to meet the increasing demand for Electroliers, which now affords us greater opportunity to render prompt and efficient service.

In conclusion we wish to advise that our electrical supply division is now fully organized to take care of your immediate demands for wiring devices. Our prices are right and we would appreciate receiving your list of requirements with your next fixture order.

Thanking you for your most valued patronage, and soliciting the continuance of your esteemed favors.

H. M. HOPPER

Saint John

N. B.

Information for the Purchaser

ORDERING:—

Always give the number of the Electrolier and state quantity and the finish required. When in a hurry order by wire, using the code for the number and finish as per example below.

SHIPMENTS:—

Unless definite shipping instructions are given, our shipping department will use their own judgment in deciding whether goods are to be forwarded via Freight Express or Parcel Post. In the absence of shipping instructions we cannot honour claims for excessive transportation charges.

CLAIMS:—

We cannot be responsible for goods damaged or lost in transit, as we take every care to prevent injury and delay. Delivery to the transportation company is deemed delivery to purchaser and when goods arrive in bad order we suggest that you file a claim with the carrier's agent and we will give you every assistance possible to collect same from them. We will not credit you for goods returned unless you have instructions from us.

SOCKETS:—

Electroliers do not include sockets or wire except those which have a notation at foot of illustration, and all candle fixtures and candle brackets, which include sockets and candles only.

GLASSWARE:—

With the exception of prismatic Electroliers, no glassware or silk shades are included except where otherwise designated.

PRICES:—

Our prices are subject to change without notice.

LENGTH:—

Electroliers are shipped in length specified in this catalogue unless instructed otherwise.

SPREAD:—

All spread measurements are taken at the centre of the bulb.

PACKING:—

No charge is made for packing cases or barrels.

TERMS:—

Our terms are F.O.B. our factory, 2% in ten days or net thirty days from date of invoice to firms with satisfactory credit rating, otherwise a deposit of 25% with the order and balance C.O.D. Open accounts subject to draft.

TELEGRAPHIC CODE:—

When ordering by wire use the code listed under each number. The following is a list of code words to be used for finishes:—

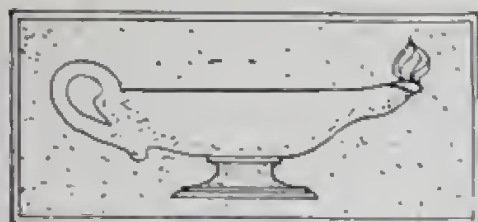

Antique Gold— <i>Fable</i>	Mottled Copper— <i>Fiscal</i>

CELESTIALITE

(Patented)
NEXT TO DAYLIGHT

The Newest type of Mazda electric lamps are so perfect, they give so much light, and light of such dazzling brilliance that it is necessary to modify and control their brightness for the same reasons that the blue sky and the white clouds are needed to temper the powerful rays of the Sun. The radiance of the new lamps is modified and controlled by Celestialite glass in such a way as to approach the best of all light—Daylight.

Celestialite glass is made of three layers of different glasses fused together when blown into the mould. These three different glasses are:

1. Clear crystal glass to provide body and strength.
2. A special translucent white glass to diffuse the rays and soften the light.
3. A rectifying layer of transparent blue glass—to whiten, clarify and perfect the light.

Combined—You have Nature's way imitated—Celestialite.

Owing to its unique construction Celestialite is much stronger than ordinary single layer glass
